

Technical Data Sheet

Blue PET tape

Features

with various colors (blue /red /transparent /white). Kinds of thickness, long time temperature resistance upon 60 degrees. Short time temperature resistance 120degrees, no residue, high tensile strength, various kinds of adhesive, Equate to Tesa64283PP / Nitto products.

Usage

Refrigerator's manufacturing/freezer foaming and device/air-condition/copy machine/print machine/fax machine/various home appliance/office equipments' fixing, perfectly replacing Nitto's same kind products.

Technical Parameters

Model	HY600-8
Inner core	76 mm±1mm
Adhesion(180 °release force)	6. 5N/25mm
Test temperature	120 °C/30mins, No residual glue at 25 °C
Initial adhesion(30°slope)	23°C, No. 2 steel ball
Durative binding	1KG1hour MRI-nondisplaced
Color	Blue
Filmthickness	0.025mm(PET)
Totalthickness	0.05mm±0.002mm
Width	2——1040 mm (±0.2mm)
inventory condition	temperature : 25°C humidity 70%RH
Tensile strength(kg/25mm)	110
Elongation at break (%)	96
Temperature resistance (°C)	120
Voltage resistance (KV)	5.0
Remark	Pass SGS
